

I respectfully request that you do not allow LPFM stations to take priority over current FM translators. I listen to K-Love, which is broadcast on a local FM translator in my area. This is the ONLY station that I listen to as it not only keeps me informed of available services provided in my area, but it provides me with music that everyone in my family can enjoy, from my five-year-old to my husband and myself. It does not waste my time with news stories that I have to turn off on TV because of the inappropriate content for children. Before finding K-Love, I tried listening to other stations, but there is very little music between all the advertising and commentary, and the musical content is questionable. K-Love provides music that is up-beat, encouraging, and provides listeners in my area with an alternative appropriate for their young children to listen to. I financially support K-Love because I want it to stay on the air.
